Open Access Journals in the Field of Education

The AERA SIG Communication of Research is developing a wiki-based tool for an annotated list of open access journals. This wiki will be announced at the 2009 AERA Annual Meeting in San Diego, CA, a Special Interest Group (SIG).

To the best of our ability to discern, we have included only links to electronic journals that are peer-reviewed, full text and accessible without cost. We have excluded professional journals that are largely not refereed, and commercial journals that may only allow access to a very limited extent as an enticement to buy. By restricting membership in this way on the list that follows, we hope a little we can to promote free access world wide to scholarship in education.

The AERA SIG Communication of Research supports the **Budapest Open Access Initiative** and encourages members to support the initiative.

Further development of search engine

- Testing and integration of classifier: better detection of educational research documents
- Wider coverage: more documents, especially from Europe
- Enhancement of user interface
- Analyze feasibility of metadata / reference extraction from fulltexts
